

PAC-ATLANTIC
Group of Companies

● BACKGROUND

The Pac-Atlantic Group was founded in 1987 through its flagship company, Pac-Atlantic Lines (Philippines) Inc. With an initial manpower strength of three (3) staff, Pac-Atlantic has achieved tremendous growth in size and resources. Today, Pac-Atlantic has evolved into several companies or subsidiaries with over 250 employees in Manila and in its branch offices.

	Dimatech	Supply of Industrial Materials and Specialty Lubricants / Maintenance
	First Global Integrated Insurance Agency, Inc.	Insurance Agency / Risk Management and Claims Advisor

Pac-Atlantic started in the transportation/shipping activity. By now, we can proudly claim that we are one of the strong leaders in the industry with the ability to offer comprehensive and integrated transport solutions to our customers.

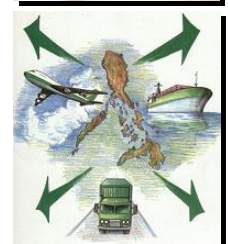

With the inevitable entry of the Philippines as the next economic tiger of Asia, Pac-Atlantic has ventured into other non-allied activities such as trading, insurance adjusting, consultancy and distribution.

● EXPANSION

With the aim of providing integrated and comprehensive logistics services to meet its customers' demands, Pac-Atlantic has expanded its resources by acquiring its own office building (5 floors), off-dock container freight station (2,800 sq. m.), warehouse (2,000 sq. m.), prime movers, trailers and vans.

● WORLDWIDE NETWORK

Pac-Atlantic provides freight services to/from almost all parts of the world through its vast network of reliable agents across the globe.

RELIABLE SERVICE

Pac-Atlantic assures smooth and reliable cargo services through the efficiency of its highly-professional, quality-driven personnel, continuously trained on the latest transport trends and on other customer-focused programs.

INFORMATION TECHNOLOGY

Pac-Atlantic utilizes customized computer applications that link each work station for faster, more efficient preparation of documents and information processing. The computer system at the Pac-Atlantic Warehouse is directly linked to the Bureau of Customs' mainframe system to ensure swift and error-free releasing of cargoes. Likewise, Pac-Atlantic now transacts some of its cargo releasing activities through the Electronic Data Interchange (EDI) and other electronic transactions.

MISSION

Pac-Atlantic is committed to be a world-class multi-modal transport operator and to provide cost-effective, innovative and comprehensive transport solutions to its customers.

We shall maintain our leadership and set industry standards in our core activities: freight forwarding, consolidation, nvocc, trucking, customs clearance and brokerage, warehousing, airfreight, project cargo and shipping agency.

Through extensive research and development, we will look at other services and activities and forge strategic alliances with corporate entities or individuals who share our vision of providing a comprehensive service package to our clientele.

We shall achieve this through continuous training and development of our managers and staff, acquisition of transportation and logistics, and the development of information technology.

VISION

We, the Pac-Atlantic Group, shall be the premiere multi-modal transport operator in the Philippines, at par with the best in the world.

We shall provide superior returns to our stockholders and maximize the value of their investments.

We shall work as a team in providing world-class transport services to our customers.

We shall provide opportunities for our employees for them to grow and shape their professional career with us.

We shall do our share in the attainment of the aspiration of our country, the Republic of the Philippines, as the next economic tiger of Asia.

We shall provide and generate employment to as many Filipinos as possible, believing in their work skills, management expertise and dedication to hard work.

SPECIALIZATION

SYNERGY

Each company within the group has its own strength and specialization. By synergizing these strengths, the Pac-Atlantic Group stands as one of the strongest Filipino logistics organizations.
